# Murmurations in Motion:

How AI Helps Marketers Move as One

# Meet Today's Experts:

**Michal Blasko**

Manager,  
Business Consultancy WE

**Taylor Whiteley**

Associate Director,  
Customer Success UK

**Chris Wilde**

Lead Technical  
Consultant

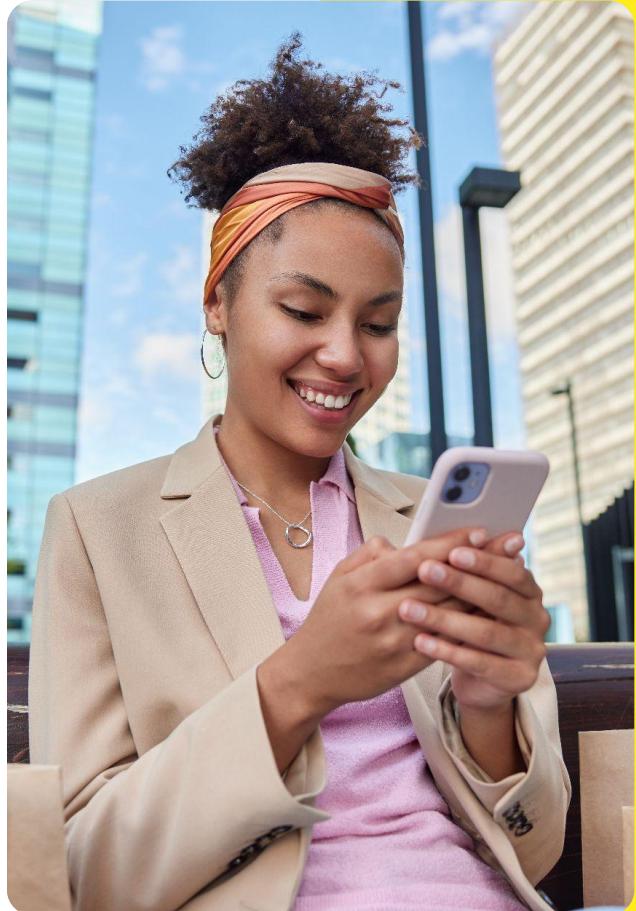

**Alice Bryant-Chidgley**

Senior Strategic Customer  
Success Manager

## AGENDA

- 1. The State of the Flock:**  
Patterns of 2025 Peak Season
- 2. From Chaos To Coordination:**  
Making Data Work in Harmony
- 3. When Messages Move in a Personalized Sync**
- 4. Panel with Bloomreach Experts**
- 5. Q&A**

# The State of the Flock: Patterns of 2025 Peak Season

# Email Remains the Powerhouse of Peak Season

## Email Still Wins:

- Most scalable, reliable marketing channel
- **600M emails** sent on Black Friday
- **510M emails** on Cyber Monday
- Black Friday = Highest engagement day

## Why It Matters:

- Best channel for behavioral and predictive personalization
- AI makes the inbox even more powerful

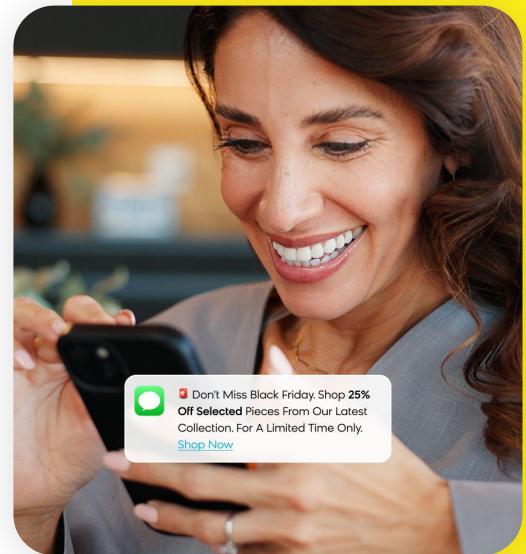

# SMS Had Another Breakout Year in the Channel Mix

## SMS is Surging During Peak Moments:

- **+104% YoY** SMS volume on Black Friday
- **+47% YoY** on Cyber Monday
- Increasingly used for high-urgency moments, not batch sends

## Why It Matters:

- Reaches customers instantly when decisions are being made
- Cuts through inbox and channel noise
- Compliments email to drive action at peak moments

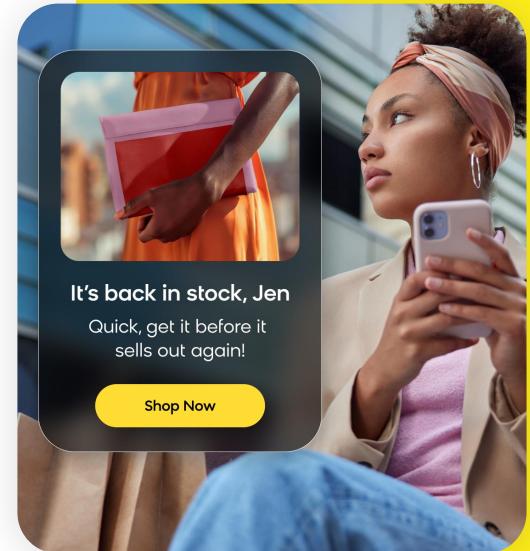

# Push Notifications Continue Steady Growth

## Push Drives Loyalty-Led Growth:

- **+6% YoY** push growth on Black Friday
- **+16% YoY** on Cyber Monday
- Strong performance with repeat buyers
- Especially effective for loyalty and app-based shoppers

## Why It Matters:

- Direct access to your most engaged customers
- Drives repeat purchases with minimal friction
- Best for timely, behavior-triggered moments

# Conversational Is Complementing All These Core Channels

## Conversational AI Spikes During Peak Shopping:

- **+113%** AI assistant messages on Black Friday
- **+61%** on Cyber Monday
- Top questions: Product details, product comparisons, gift guidance
- Predominantly mobile and late-night conversations

## Why It Matters:

- Supports demand spikes when human teams aren't available
- Captures high-consideration moments in real time
- Complements email and SMS during peak season

POLL

What was most surprising to you about the 2025 BFCM data?

# From Chaos To Coordination: Making Data Work in Harmony

# The Reality of Modern Marketers

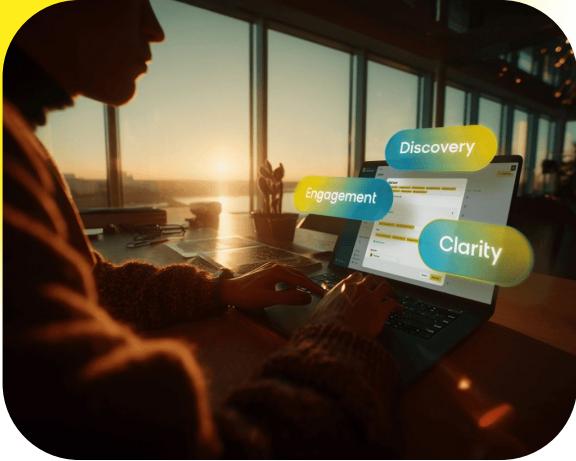

## Today's Environment:

- Multiple channels and touchpoints
- Expanding catalogs and regional complexity
- Rising expectations for real-time personalization

## The Result:

- Fragmented data pipelines and inconsistent schemas
- Repetitive work and inefficiencies across teams
- Slower execution and higher operational overhead
- Limited ability to measure and optimize experiences

# Introducing Bloomreach's Data Hub

## What Data Hub Does:

- Unifies product and customer data across your ecosystem
- Replaces fragmented, point-to-point integrations
- Creates a single, consistent data flow for all channels

## What This Enables:

- Faster, cleaner data movement
- Lower operational complexity

**Available now for new integrations**

# Modern Marketing Has Data at the Heart

## A Data Foundation Allows You To:

Execute on  
strategic goals

Determine  
AI's output

Predict overall  
AI performance

## Different AI Types Require Different Data:

- **Predictive AI** relies on consistent, structured data
- **Generative AI needs** rich descriptions, naming, and metadata

# Standard Predictive AI: Autosegments

## Autosegments Explained:

- AI-generated customer groups built from behavioral and transactional patterns
- Automatically clusters customers with shared traits
- **Examples:** High-intent shoppers, bargain hunters, new vs. returning buyers

## Data To Define:

- Which customer attributes and actions matter most?
- Which performance metrics define success?

The screenshot shows a user interface for 'Autosegment setup'. At the top, a message says: 'Please provide the specific customer attributes that will define the segments. Our AI will then process and generate all appropriate segments accordingly. It's important to note that the segmentation process will be constrained to a maximum of 1,000 segments.' Below this, a section titled 'Generated segments will be based on' lists 'these customer properties:' with several items like '[OASE] last session start browser', '[OASE] last session start country', and '[OASE] most common view\_item.brand'. Another section lists 'and following metrics will be calculated:' with items like 'average revenue in last 180 days', 'email CTR', and 'count(customer)'. A 'Minimum user count for each segment' input field is set to '1000'. A 'CUSTOMER FILTER' button is shown as 'Active'. The interface has a clean, modern design with a white background and light gray borders for the input fields.

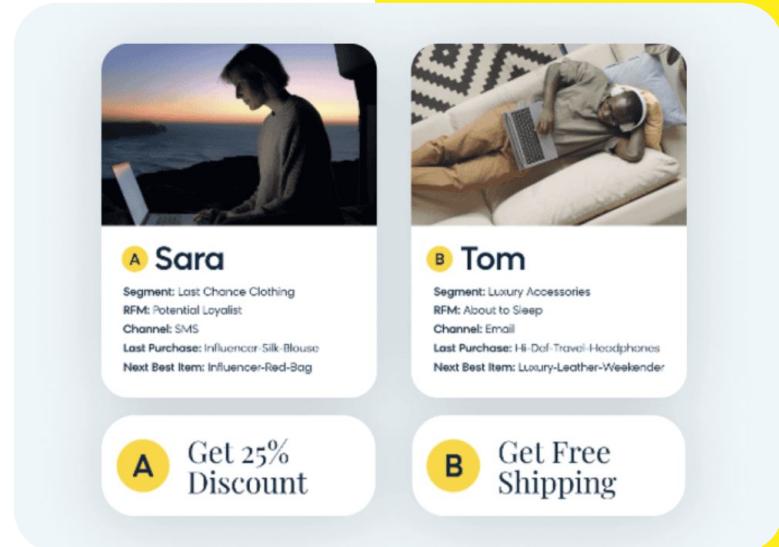

# Generative AI: Contextual Personalization

## Contextual Personalization Explained:

- Uses GenAI to interpret intent and meaning from signals
- Delivers individualized experiences in real time
- Responds to context instead of predefined segments

## Data To Define:

- What customer properties and actions could relate to different messaging?
- What messaging hypothesis could I consider?

The image shows two mobile device screens side-by-side, each displaying a personalized offer for a customer. The left screen shows a woman (Sara) sitting at a beach at sunset, and the right screen shows a man (Tom) sleeping in bed. Both screens include a yellow circular icon with a letter (A or B) and a promotional message.

Customer	Segment	RFM	Channel	Last Purchase	Next Best Item
Sara	Last Chance Clothing	Potential Loyalist	SMS	Influencer-Silk-Blouse	Influencer-Red-Bag
Tom	Luxury Accessories	About to Sleep	Email	Hi-Def-Travel-Headphones	Luxury-Leather-Weekender

**A** Get 25% Discount      **B** Get Free Shipping

# Get the Most Out Your AI Models

1

## Capture Rich Signals

Leverage preferences, sizes, styles, interests, and browsing behaviors

2

## Stay Consistent

Keep data clean and structured for AI to find accurate patterns

3

## Experiment Continuously

Use AI to trends and your marketing expertise to maximize relevance and ROI

POLL

Which **data challenge**  
deserves a spot on your  
2025 “Naughty List?”

# When Messages Move in a Personalized Sync

# The Personalisation Lifecycle

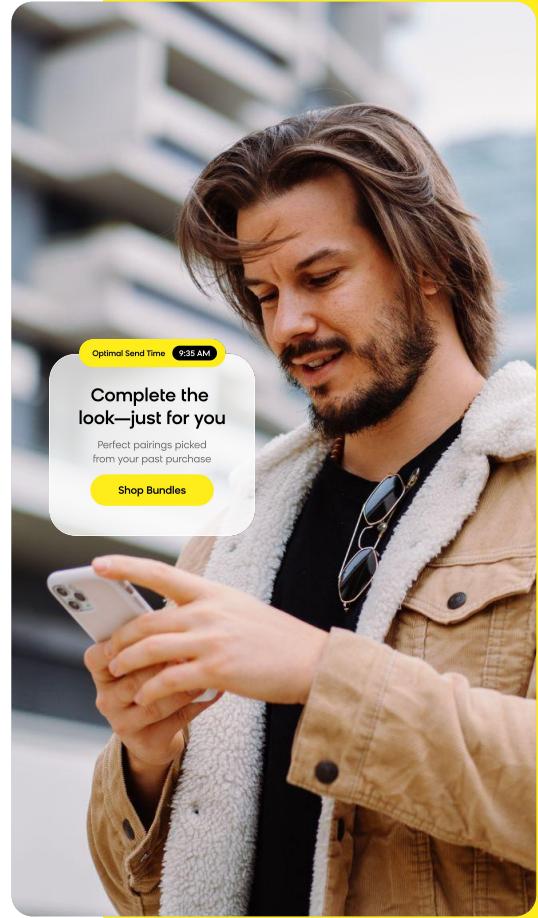

# Meet Customers' Expectations for Personalization

## Expectations Have Changed:

- Customers expect emails to feel relevant and timely
- First-name personalisation no longer works in silo
- Real impact comes from behavioral data and context

## Personalisation Enables Your Brand To:

- Stand out in crowded inboxes
- Build meaningful connections
- Drive engagement and conversions

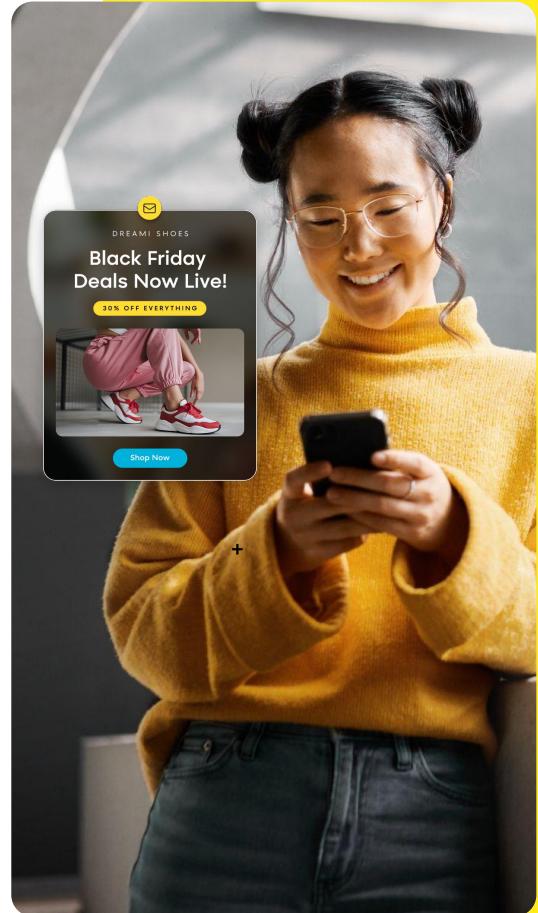

# Prioritize Real-Time, Fluid Journeys

## Email Must Keep Pace With Customer Behavior:

- Shoppers move seamlessly across channels
- Email must reflect real-time behavior, not static plans
- AI enables instant, responsive personalisation

## Email Can React To:

- Browsing behavior
- Recent purchases
- Engagement signals

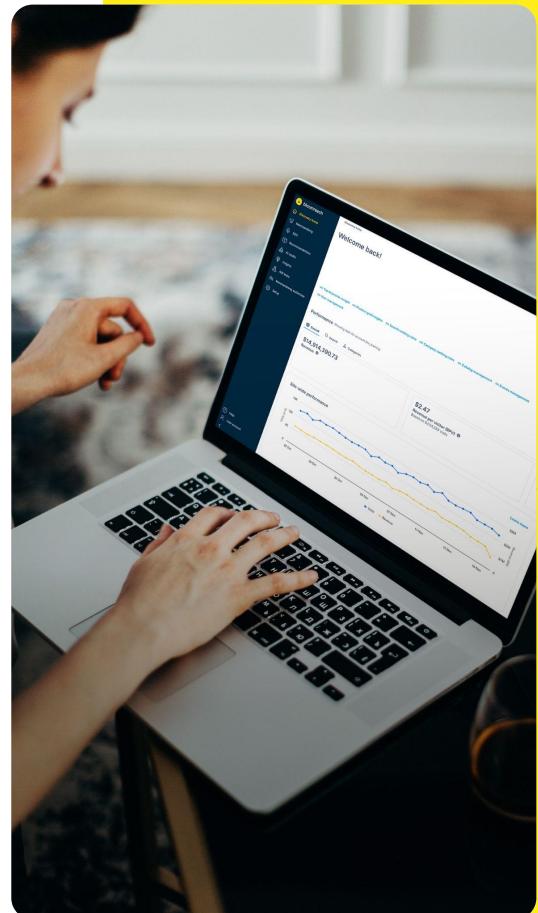

# Reconfigure Your Data Approach

## Trust Is the Foundation of Personalisation:

- Inbox access is earned, not guaranteed
- Clean, consented first-party data makes personalisation feel valuable instead of invasive

## The Payoff:

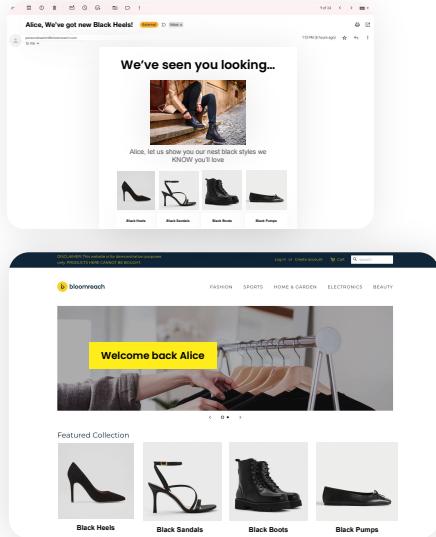

- Higher engagement and click rates
- Stronger customer loyalty
- Long-term brand credibility

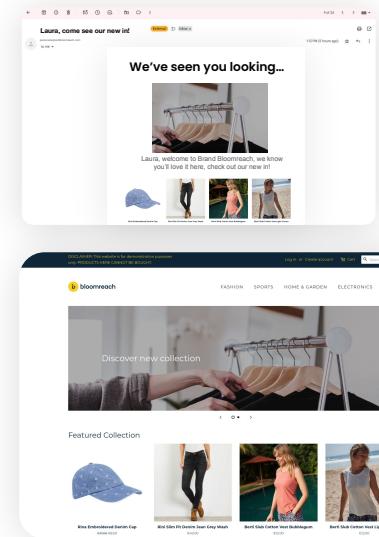

# The Goal: Personalised Messages Across All Channels

Returning Customer

New Customer

Send what matters, when it matters, on the channel customers prefer

POLL

If your email program could deliver **one Christmas miracle** in 2026, what would you hope for?

# Murmurations Panel:

Success Manager

If you had to summarize the  
**biggest shift in customer  
behavior** brands are seeing  
this year, what would it be?

What's the most common  
data "red flag" you  
see that marketers  
underestimate?

If a brand could only  
improve upon **one channel** in  
**2026** – what should it be,  
and where should they start?

What's one pattern you're  
seeing right now that  
marketers should act on to  
strengthen AI-driven  
personalization in 2026?

What's one **outdated personalization tactic** you wish brands would retire in 2025, and what should they replace it with?

# Bonus content

# Murmurations: Why Patterns Matter More Than Predictions

- In a world where AI capabilities shift weekly, the marketers who thrive don't try to outguess the future, they stay in tune with emerging customer and team behavior patterns.
- Murmurations show how coordination can emerge without centralized control — just shared awareness and responsiveness.
- For marketing teams, this means using real-time data and signals to guide decisions instead of relying solely on predictions.
- When teams align around shared intelligence rather than isolated predictions, they move faster and more cohesively — just like birds in a murmuration.
- The takeaway: *Collective observation beats individual prediction.* Winning teams don't chase forecasts — they move together, guided by real signals, adapting in sync as conditions change.
